

FillMaster® 4000 Digital Water Filtration System

Description: Revolutionize your pharmacy workflow with the Fillmaster® 4000 — the smart, automated solution for fast, accurate liquid medication reconstitution. Engineered for precision and designed for simplicity, the Fillmaster 4000 pairs with the FillPure™ Water Purification System to deliver consistent, high-quality results with every dispense.

Medisca includes the FillPure Water Purification System with every Fillmaster 4000 purchase — no separate water system purchase required.

An optional Fillmaster Customer Service Plan is available (sold separately through Fillmaster, not Medisca) for added convenience and support. For pharmacies offering customized flavoring, a FLAVORx flavoring guide can also be purchased and delivered straight to your unit.

Features:

- Fully automated water dispensing for effortless, accurate medication reconstitution
- Includes the FillPure Water Purification System – no separate purchase required
- Tracks reconstitutions and dispenses for improved traceability and compliance
- Barcode scanning with over 6,500 NDCs pre-loaded for quick, error-reducing workflow
- 5" touchscreen display offers an intuitive, user-friendly interface
- Wi-Fi enabled for software updates and database management
- Engineered for precision, with water dispensing accuracy of $\pm 3\%$
- Compact, space-saving design ideal for busy pharmacy environments
- Reduces manual steps, streamlining pharmacy operations and saving valuable time
