

IV Bag, Empty, 2 ports, EVA, 50 mL (Sterile)

Description: This sterile empty IV bag is made with EVA (Ethyl Vinyl Acetate) material that does not contain harmful plasticizers such as DEHP, which can leach into TPN solutions. It is also more durable for reduced breakage, more stable for improved safety and more transparent for improved admixture inspection.

Features:

- Packaged in individual perforated poly bag
- Not made with natural rubber latex or DEHP
- Ports and tubing are made of PVC
- Fill using the injection site
