

**PRODUCT NO.: 5629**

## **RDT Tamper Plate, Medi X-TABB™**

**Description:** The X-TABB Tamper Plate is designed specifically to conduct easy filling of powder mixtures by tamping between cavities fill cycles in Medi X-TABB System. Generally, with X-TABB Tamper Plate, three filling and tamping process repetitions are appropriate to completely fill the cavities in preparation for the heating cycle of Medi X-TABB System. It also acts as a heat sink to contain and consistently heat the compressed powder within cavities during heating cycle. Simply place Tamper Plate flat surface over the cavity plate with bosses facing up.

### **FEATURES:**

- Made of durable and lightweight aluminum coated with US FDA and EU compliant non-stick technology
- Easy-to-use and easy-to-clean surface
- Hard coating resists scratches and reasonable wear when used in accordance with instruction provided

### **TECHNICAL SPECIFICATIONS:**

Dimensions (inches) (Approx.)	13 x 13
Material	Hard coated Aluminum

### **Additional Information:**

- Used with Cavity Plate w/out Overflow (5628) and Quarter Score Plate (5627)
