

**PRODUCT NO.: 5624**

## Heat Deflector Plate, Medi X-TABB

**Description:** The Heat Deflector Plate is specifically designed to use when compounding multiple replicates of Rapid Dissolve Tablets by using Medi X-TABB System. It acts as a heat sink to contain and consistently heat the compressed powder within cavities. Placed over the top of the cavity plate while heating, it enables the compounder to use the tamper plate for the next set of RDT using additional cavity plate.

### FEATURES:

- Made of durable and lightweight high-grade aluminum for optimal heat distribution

### TECHNICAL SPECIFICATIONS:

Dimensions (inches) (Approx.)	13 x 13
Material	Aluminum
Thickness (inches)	0.25

### Additional Information

- Sold separately. Not included with Medi X-TABB Mold (RDT System) (Code: 5650)
