

Reliable, Compact, and **Powerful**

The Medisca ProMill® Basic milling machine is a tabletop, adjustable, three-roll mill that reduces particle size in ointments, creams, pastes, gels, and suspensions. The three rollers rotate in opposite directions and at different speeds, creating shear force that moves the preparation through the milling machine resulting in smaller, more uniform particle size and a homogeneous blend that produces a high quality final preparation.

Key Features

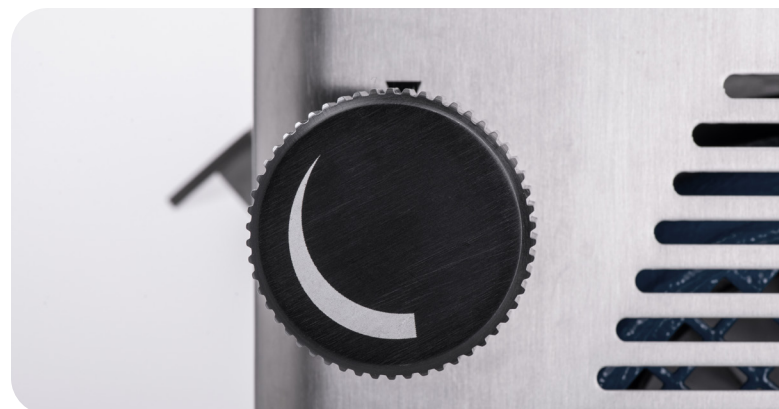

- 7 settings to support effective milling of particle sizes with range of 10 - 250 microns
*Results may vary
- Larger 1250 mL Hopper allows for greater processing capability
- Max Capacity 8.35L/H
- Inox (Stainless Steel) housing cleans easily and does not discolor over time
- Durable ceramic rollers made from 99.7% purity aluminum oxide
- Equipped with safety features; auto-stop and safety bar for use while cleaning
