

NovaFilm™ Oral Transmucosal Films (OTF) Kit

Description: Introducing for the first time to compounding markets around the world, NovaFilm™ Oral Transmucosal Films. Applied as a thin layer to the oral cavity, Oral Transmucosal Films (OTF) are an innovative mucoadhesive system that opens numerous possibilities for providers, pharmacists and patients. Leveraging the power of NovaFilm Gel Base and colliding it with a cutting-edge molding process, Medisca has expanded the capacity of NovaFilm from versatile mucosal gel to the oral transmucosal film – a two-in-one product for your convenience.

Patent Pending.
