

RocketMolds™ suppository holder, 60CT, with LED light

Description: Cleanable and durable polymer construction with two channels that will accommodate 60 total RocketMolds.

Features:

- Dimmable LED backlight that runs down the center channel for easy visual filling of suppository strips
- LED backlight securely attaches to holder by magnets and easily removes for cleaning
- Non-slip feet to keep holder secure while compounding
- Also works well with traditional PVC type shell molds

Technical Specifications:

Input voltage	100-240V
Operating voltage	12V DC
Dimmable levels	10
Life expectancy	>30,000 hrs
