

Samix® Constantia

Mixing made simple with consistency you can trust

The Samix® Constantia is a compact, high-efficiency mixing device designed for today's compounding needs. It features an intuitive touchscreen and works with all standard Samix accessories to support smooth workflows and consistent, high-quality results.

Smart space-saving design

Fits comfortably under a hood and frees up valuable space.

Built to last

Brushless motor engineered for durability, low maintenance, and long, heavy-duty shifts.

Capacity without compromise

Effortlessly handles volumes from 15 mL to 1000 mL.

Fast, intuitive control

Touchscreen interface makes setup, adjustments, and batch changes quick and seamless.

Consistency you can trust

Memory function stores your go-to settings, helping you reproduce batches with confidence.

Connected when it counts

LAN/Wi-Fi connectivity supports controlled environments and remote monitoring needs.

Versatile programs

Preset modes for creams, gels, suspensions, emulsions, and a wide range of semi-solid preparations.

Easy clean-up

Smooth, minimal-crevice surfaces streamline wipe-downs between batches.

 Applies exclusively to the Constantia S model.

A new generation of Samix® built to perform

With a smarter design, stronger performance, and full compatibility with your existing setup, Constantia and Constantia S replace the ES500 and U1000 without disrupting your workflow. Your existing jars and accessories fit seamlessly, ensuring a smooth, and cost-efficient transition.

What's new?

- Touchscreen control for clear, fast navigation
- Memory function for one-tap recipe recall
- Remote-ready for safe, efficient operation
- Compact footprint ideal for under-hood setups
- Brushless motor for long-lasting reliability
