

**PRODUCT NO.: 9740**

## **Stir Bar, Magnetic, SpinPlus, White, 1 x 1"**

Teflon w/Alnico-V Magnet, White

**Description:** This magnetic stir bar provides effective stirring of samples via magnetic manipulation. Due to the large surface area, the stir bar provides optimum turbulence while stirring. It is coated in Teflon to provide chemical inertness. This results in no contamination or reaction with the solution it is mixing.

### **FEATURES:**

-  Manufactured in a registered ISO 9001:2008 facility, as verified by SGS certification
-  Autoclave safe
-  Alnico magnet encapsulated in USP Class VI Teflon PTFE low friction coating; durable and inert
-  The "+" shape creates a deep vortex and provides stable, quiet operation
