PRODUCT NO.: 8858

MOP, CLIPPERMOP (ISO Class 3-8)

7" x 4" Head Assembly w/Telescoping handle (30"-53")

DESCRIPTION: This mop is designed to use standard 9" x 9" cleanroom wipers, eliminating the need to qualify and inventory additional wipers or mop covers. This mop may not be used with wet, dry or sterile wipers, and is compatible with protocols for ISO Class 3 to 8 cleanrooms, sterile and aseptic areas.

The mophead utilizes non-abrasive polyethylene clips to securely fasten one or multiple wipers to the head. The mop's wiper attachment method does not release particles, fiber, and dirt.

This mop can be used in these applications: (1) Flat vertical and horizontal surfaces in cleanrooms, antechambers, gowning rooms and subfloor areas (2) The small size conveniently cleans hard-to-reach areas, walls, ceilings, floors and equipment exteriors (3) Cleaning in pharmaceutical, biomedical, aseptic pharmaceutical compounding and medical device industries.

FEATURES:

- ✔ Cleanroom compatible mopping system
- ✔ Non-abrasive polyethylene clips to secure and to release wipers
- ✔ Compatible with sterilization by gamma irradiation, chemicals, Vaporized Hydrogen Peroxide (VHP), Ethylene Oxide (EO)
- ✔ Polyester foam pad for efficient wipe contact with surfaces
- ✔ Low profile swivel head design with slightly rounded corners
- ✔ Double bagged
 - ✔ Bag-within-a-bag cleanroom packaging
 - ✔ Allows for inner bag wipe-down before introduction into cleanroom
- ✔ Telescoping extension handle (powder coated steel)
- ✔ Less expensive
- ✔ Inventory simplification – same wipers for wiping surfaces and for mopping
- ✔ Eliminates dirt, fiber and particle release from "star-type" mops
- ✔ Uses wipers that have already been validated
- ✔ Quick and easy wiper change
- ✔ Loading multiple wipers streamlines the mopping process
- ✔ Swivel head assembly allows access to hard-to-reach areas
- ✔ Lightweight, easy to handle
