

PRODUCT NO.: 8719

SERUM VIAL w/STOPPER & SEAL, STERILE (Amber, 30mL, 20mm)

Description: All vials are sterile. Prior to vial assembly, vials are dry-heat sterilized and stoppers are steam-sterilized. The vials/stoppers are assembled on an automated line located in a Class 100 suite. The vials are subsequently capped in a Class 100,000 environment. Lot release sterility testing conforms to requirements set forth in USP <71>.
